Tel Aviv - Yaffo

Full-Stack developer with hands on experience developing web applications using Javascript, ReactJS, and NodeJS. I am an autodidact, I take initiative, and am always looking for ways to bring my team to the next level.

Professional Experience

Frontend Developer - Zoomin Software

March 2021 - present | Tel Aviv

- Zoomin is a B2B SaaS company providing content solutions using React, Typescript, Redux, Haskell and AWS.
- Develop custom functionality and features for clients, seeing features through their full lifecycle working closely with design and product teams.
- Contribute to Zoomin's internal component library.
- Implement good practices for the development team improving productivity and accuracy, like naming conventions for branching, git pre-commit hooks for formatting, and initiate weekly meetings to broaden the teams domain knowledge.

Full-Stack Developer - Jama

September 2020 - March 2021 | Tel Aviv

- Jama is a social media website for mothers and pregnant women written in React, NodeJS and Firebase.
- Develop front end and back end functionality for new features including chat system, activity signup, payment management, reviews and many more.
- In charge of deployment as well as git merges and code review for another developer.
- Refactor disorganized code to make it more maintainable and to improve readability.
- Work closely with all company teams to design and develop new features.

Education

Israel Tech Challenge

2020 | Full Stack Engineer Bootcamp

Excellency scholarship recipient based on academic excellence and overall performance. ITC is a three month intensive coding bootcamp using project based learning.

Jerusalem Academy of Music and Dance - Classical Performance

2012 - 2018 | M.Mus & B.Mus

Full scholarship recipient of the Nazarian Program of Excellence in Chamber Music throughout both degrees.

Online Training and Courses

I am a life long learner. In addition to excessive 'Medium' reading, some of the online courses I've taken are: The Complete Guide to Advanced React Component Patterns, CS50 Intro to Computer Science, JavaScript Algorithms and Data Structures, and The Modern JavaScript Bootcamp. (Udemy/Harvard University)

(some of the) Technologies I work with:

React | Typescript | JavaScript | NodeJS | Express | Python | Jest | React Testing Library | GCP

Languages:

English - Native | Hebrew - Fluent
